

Booster Pumps

reliable & energy efficient

high output

easy to install

AQUA  **QUIP**

Proven reliability

Ensure your pool stays crystal clear all year round with a reliable Aqua-Quip booster pump to drive your pressure pool cleaner. High output, robust construction, energy efficient operation, low maintenance. Single centrifugal impeller ensures whisper quiet running and simplicity of operation, ensuring a trouble-free service life. Designed to suit rigid PVC connections with barrel unions or flexible hose. Compact and simple to install.

Barrel unions are supplied for direct connection to 40mm pressure pipe.

Flexible plumbing option is ideal for installations where space is limited.
