

# Legend Platinum Pool Cleaner

advanced technology

fast & efficient

simple maintenance

**AQUAQUIP**

## The most powerful pool cleaner

There's only one choice for the most advanced pool cleaning technology ever developed, the Legend Platinum. It is clearly the best engineered, best looking and best built pool cleaner available.

Designed for fast and efficient cleaning, Legend's Four Wheel Design and Front Wheel Drive allow for superior tracking and stability. Deep pools, slippery surfaces, tight corners and other challenging shapes are no problem for the Legend Platinum.

The newly engineered Debris Channel combines with a huge intake throat to pick up more large leaves, sand and silt.

The Double-Jetted Vortex Venturi creates stronger vacuuming action and the heavy duty twist lock collection bag is designed for simplistic maintenance.

The Legend Platinum is powered by the Aqua-Quip booster pump and requires a dedicated plumbing provision.
